

Osprey

Restaurant

Osprey,

also known as the rare fish-eating bird that lives in the area, has a naturalistic concept and unique actuality is shown in every single detail in the interior. The place is rather a concept than a restaurant that provides shops, boutiques, beach area with private cabanas, Bedouin area and a Sea Museum.

Osprey is ready to host special events, parties, weddings and Gala Dinners as well as welcomes overnight camping manias.

Ras Muhammed

is the first natural protectorate that has been established in Egypt.

It's a gem that has a unique biological variety for both the land and sea as it hosts a lot of species of birds, mammals & sea creatures that go back to 20 million years ago.
